

BILDIT is the AI-powered Visual Experience Engine for modern eCommerce. Marketing teams build, preview, and publish rich, personalized content visually, then ship it live in minutes instead of days. No dev tickets, no deploy cycles, no performance trade-offs. Built for Next.js, Shopify Hydrogen, and headless commerce, BILDIT gives brands one place to control every experience and move at the speed of their ideas.

01

Build visually

Templates with real brand control. Type, color, and layout, all without code.

02

Preview instantly

See exactly what customers see before it goes live. No surprises.

03

Publish immediately

No deploy cycle. No coordination overhead. No waiting.

PROVEN WITH PREMIUM RETAIL

"We can make a change immediately, and it's reflected immediately. My team can publish without an IT team or a developer."

WHAT THE VISUAL EXPERIENCE ENGINE DOES

Visual building

A real visual editor with type, color, and layout control, all on brand and all without code.

Instant publishing

Ship content live with no developer tickets, no deployments, and no waiting.

Live preview that works

See exactly what customers see before it goes live, with no staging guesswork.

Advanced scheduling

Plan launches, promos, and seasonal updates on your calendar, with no deploy queue.

Personalization built in

Target and tailor experiences by audience, channel, and moment, all without code.

Commerce connectors

Powers headless storefronts on Shopify Plus, Salesforce, Adobe Commerce, and SAP.

WHO IT'S FOR

Premium eCommerce brands and retailers on Shopify Plus, Salesforce, Adobe Commerce, or SAP

Marketing teams bottlenecked by developer availability and deploy cycles

Brands running frequent promotions, campaigns, and seasonal content

Teams that want to own and control every experience, not file tickets

Agencies building Next.js and headless storefronts for their clients

CONTENT YOU CAN BUILD

- Instagram-style Stories
- Custom brand PLPs
- Category carousels
- Multi-level carousels
- Video players
- Product grids
- React components
- Templating language
- Responsive images
- Inventory & analytics checks

The Visual Experience Engine for headless commerce. Purpose-built so marketers build and publish premium experiences without ever waiting on a deploy.

WHY BILDIT

Marketer control

Your team owns content end to end, freeing engineers for product work.

Faster time to market

Build visually and publish instantly, with no deploys or release calendar in the loop.

Performance built in

Guardrails keep pages fast and stable even as marketers ship content constantly.

Enterprise proven

Trusted by leading retailers to run premium storefronts at scale.
